Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech (Computer Science)	ABESEC Ghaziabad, AKTU University	7.5(Current)	2022-Present
Senior Secondary	CBSE Board	85%	2022
Secondary	CBSE Board	90.2%	2020

Skills

Programming: Python, Go, C, C++, JavaScript, Java

Frameworks: Django, Flask, FastApi

Tools: Docker, GitHub, Kaggle, Visual Studio Code

Databases: MySQL, MongoDB, PostgreSQL, Sqlite3

Operating Systems: Windows, Linux

Experience

Software Engineering Intern - LambdaTest

Mar 2024 - Jun 2024

- Built an end-to-end master device management system utilizing Java, Go, MySQL, and Redis
- Collaborated with senior engineers to identify, troubleshoot, and resolve critical issues in the system, ensuring seamless device operations.
- Gained hands-on experience with networking protocols and operational mechanics, enhancing system efficiency and scalability.
- Contributed to automating device management processes, significantly reducing operational overhead and improving system performance.

Software Development Intern - Rapid Innovation

Feb 2025 - Present

- Worked on the **HRMS (Human Resource Management System)** to enhance workforce management and automation.
- Developed key modules using **Django, Python, Django REST Framework, PostgreSQL, HTML, CSS, JS**.
- Worked alongside senior engineers to diagnose, troubleshoot, and resolve critical system issues, ensuring smooth and efficient device operations.
- Improved system logging and error tracking using **Sentry**, enhancing debugging efficiency.

Projects

Multi-Vendor E-Commerce Website

Jan 2025 [GitHub Link](#)

- Developed a multi-vendor e-commerce platform where vendors can list and sell their products.
- Designed and implemented the platform using Python, Django, Go, HTML, CSS, and JavaScript for a seamless user experience.
- Tech Stack: Python, Django, Go, HTML, CSS, JavaScript

AI Web Scraper

Oct 2024 [GitHub Link](#)

- Developed an AI-powered web scraper that extracts and processes website content using Selenium and AI models like Gemini.
- The application allows users to input a URL and a prompt, retrieves relevant data, cleans the content, and generates AI-driven insights based on the provided instructions.
- Tech Stack: Python, Selenium, BeautifulSoup, Gemini API, Streamlit, LangChain

Movie Recommender System

Jun 2024 [GitHub Link](#)

- Developed an intelligent movie recommendation system leveraging large language models (LLMs) and LangChain for advanced contextual understanding.
- Integrated Flask to build a responsive web interface for users to interact with personalized movie suggestions.
- Tech Stack: LangChain, Flask, Python, RAG, Gemini API, NLP, Pandas, Kaggle, HTML, CSS, JavaScript

Positions of Responsibility

Technical member of ACM - CS Club, ABESEC College

Dec 2023 - Present

- Worked on club website.

Achievements

- First Place, Internal Hackathon (CS Branch)
- Participated in GFG HackVerse, SNU HackData, etc
